国际组织

(第二版)

《国际组织》编写组

SYLLABUS

- Teaching Objectives and Requirements;
- Grading System and Evaluation Methods

LEAD-IN

- 1 organization
 - international organization
- 2 social policy
- 3 global social policy

1 ORGANIZATION

- 组织是人们按照一定的目的、任务和形式组建起来的相互协作的社会群体。也可以理解为：在一定环境中，为实现某种共同的目标，确保人们社会活动正常协调运行、顺利达到预期目的、具有特定功能的开放系统。
- An organization is a cooperative social group that people form around a shared purpose, task, and structure. It can also be defined as an open system that, within a given environment, unites individuals to achieve a common goal, ensures the orderly coordination of social activities, and smoothly attains desired outcomes.

BASIC PROPERTIES

- 1) An organization is a set of behavioral relationships that arise through people's interactions.
- 2) It is consciously created to pursue specific objectives.
- 3) It manifests human cooperation founded on the division of labor.
- 4) It possesses a definite structure and pattern of behavior.
- 5) It develops an internal spiritual consciousness that is deliberately cultivated rather than spontaneous, eventually crystallizing into a systematic organizational culture.
- 6) It is an open system that evolves organically with its environment.

PUBLIC/SOCIAL ORGANIZATION

- Society contains many types of organizations. Some seek economic gain and aim to maximize profit and self-interest; these are private organizations, exemplified by business enterprises.
- Public organizations stand in contrast: their purpose is to safeguard the public interest, deliver public services, and protect citizens' rights.

PUBLIC ORGANIZATION

- In the broad sense, a public organization is any entity whose purpose is to manage public affairs and provide public services. This includes not only government and its executive agencies but also legislatures, courts, schools, hospitals, the military, political parties, and other associations that pursue the public good.
- In the narrow sense, it refers solely to government and its executive branches, along with socially authorized administrative bodies.

FOUR KEY POINTS

- Understanding public organizations involves four key points:
- First, their fundamental duty is to protect and advance the public interest by administering state and societal affairs.
- Second, they do not seek profit while organizing, producing, or supplying public goods and services.
- Third, they manage public affairs by exercising public power.
- Fourth, they operate within specific territorial jurisdictions.

2 SOCIAL POLICY

- Social Policy is concerned with the ways societies across the world meet human needs for security, education, work, health and well-being.
- Social policy addresses how states and societies respond to global challenges of social, demographic and economic change, and of poverty, migration and globalisation.

- Social Policy analyses the different roles of: national governments, the family, civil society, the market, and international organisations in providing services and support across the life course from childhood to old age.
- These services and support include child and family support, schooling and education, housing and neighbourhood renewal, income maintenance and poverty reduction, unemployment support and training, pensions, health and social care.
- Social policy aims to identify and find ways of reducing inequalities in access to services and support between social groups defined by socio-economic status, race, ethnicity, migration status, gender, sexual orientation, disability and age, and between countries.

3 GLOBAL SOCIAL POLICY

- Global social policy refers to the frameworks, principles, and practices aimed at addressing social issues that transcend national borders. It encompasses a broad range of areas, including poverty reduction, health care, education, labor rights, and social protection.
- The scope of global social policy is not limited to government actions but also includes the roles of non-governmental organizations (NGOs), international organizations, and civil society.

- The definition of global social policy can be understood through its core components:
- Universalism: Principles that advocate for universal access to basic services and rights.
- Solidarity: The notion that nations and peoples should support one another in achieving social goals.
- Equity: The pursuit of fairness in the distribution of resources and opportunities.

KEY ACTORS

- Key Actors and Stakeholders in Global Social Policy:
- International Organizations: Entities like the UN, World Bank, and International Labour Organization (ILO) set standards and provide technical assistance.
- National Governments: Governments are primary actors in implementing global social policies within their jurisdictions.
- Non-Governmental Organizations (NGOs): NGOs often serve as watchdogs, advocates, and service providers in the realm of global social policy.
- Civil Society: Grassroots movements and community organizations are vital in influencing policy agendas and ensuring that policies are responsive to local needs.
